## ENVIRONMENT MAINTENANCE MANAGEMENT WATER TREATMENT – WASTE MANAGEMENT

### DIMO MAINT: YOUR CMMS PARTNER

The range of DIMO Maint's CMMS solutions is specifically designed to meet the needs to **private companies, service providers or local authorities in the environment sector.**

- **Reduce the environmental impacts** related to the **water treatment and cleaning activities** and those connected with **sorting, collecting, disposing, energy recovering and recycling of waste,**
- **Keep in operational conditions the equipment, work and other facilities** to ensure the services of water and waste treatment: **sewage and effluent plants** (turbines, screen rakes...), **sewage network, collection vehicles, waste sorting facilities, waste disposal plants, incineration plants, recycling centres, disposal or recovery of waste** (ordinary, industrial, dangerous waste, etc.),
- **Coordinate and improve the maintenance services** while continuously searching for quality,
- Manage **the energy** in an optimal way.

By ensuring the continuous performance of the equipment, DIMO Maint's CMMS plays a key role regarding the quality and continuity of the service provided:

- Structure the fleet to maintain in tree form: **sites, work, processes, functions, facilities, equipment, automatic devices, sensors...**,
- **Have access to accurate information about the equipment** : location, condition, list of spare parts, operating modes, plans and documents,
- Launch preventive maintenance as appropriately as possible, based on **run and wear indicators (meters, measures)** retrieved in real time from the supervision,
- **Interface the CMMS application with the supervision connected to the sensors** in order to retrieve events (malfunction alarms, number of cycles...), measures (levels, temperatures...),
- Monitor the **systematic maintenance, inspection visits, calibration and preventive cleaning** recommended by the manufacturers and the legislation.

## SOLUTIONS ADAPTED TO THE SPECIFICITIES OF YOUR BUSINESS SECTOR

- Asset management: attached documents, preventive and regulatory plans, work tracking, monitoring counters, etc.,
- Equipment localization by view,
- Internal and external resources and service contracts management,
- Creation of a preventive plan for technical and power installations maintenance,
- Technician schedules management,
- Spare parts and store inventories management,
- Interfaces available with the main data monitoring systems on the market (PcVue, Wizcon, etc.),
- Costs and budgets monitoring and equipment replacement decision-making.

### About DIMO Maint
