

DIMO MAINT: YOUR CMMS PARTNER

In addition to the significant financial issues, the normative context in which public works companies operate requires them to:

- Increase the **performance of the equipment** while maintaining an optimum safety level
- Ensure **better coordination** of material and human resources
- Ensure the **service continuity**

The range of DIMO Maint's CMMS solutions is specifically designed to help companies to:

- **Maintain the construction equipment** used in remote or local building sites
- **Increase the resource availability** and improve the productivity of leased equipment
- **Fuel and tyres** consumption monitoring
- **Spare part managing**
- **Manage and control the costs** of the public work equipment fleet

By ensuring the **performance of the equipment** used (leased or not) by public works companies, DIMO Maint's CMMS plays a key role regarding the **quality and timeliness of delivered works** and enables you to :

- **Implement a preventive maintenance plan** for the equipment and heavy machinery park
- **Organise and monitor the work** of mechanics
- **Manage the schedule of machinery allocation** per building site
- **Manage the stock of spare parts**
- **Assist in invoicing the customers**

SOLUTIONS ADAPTED TO THE SPECIFICITIES OF YOUR BUSINESS SECTOR

Fuel management

- **Fuel consumption monitoring** per vehicle, agency, etc.,
- **Fuel tank** management,
- **Manual entry of refuelling volumes** per vehicle with cost evaluation or direct importation from a fuel pump,
- **Costs and analyses history** (fuel consumption report per vehicle, type of vehicle, etc.).

Tyre management

- **Identification of each tyre** through a special form: serial number, mileage, wear, condition, spare tyre, etc.,
- Tyres can be easily mounted and dismantled through a **work order management system**: the tyres are visible in the tree structure below the vehicle and the life cycle record is easily consulted,
- The tyres **automatically** follow the vehicle's mileage,
- **Repair operations tracking per tyre** and definition of a preventive plan (regulatory, safety, etc.),
- **History of locations**, wear, costs, retreads, and precise, meticulous and quantified monitoring of tyres and their use.

Registration certificate Management

- Ability to manage the **registration certificates** (company name, serial number, type, date of 1st registration, type, vehicle make, regional and parafiscal charge, etc.).

About DIMO Maint

100% subsidiary of DIMO Software, today DIMO Maint is the leader on CMMS market serving more than 3.500 customers and has lead over 1.100 projects worldwide.
