SKI LIFTS – VEHICLES – ARTIFICIAL SNOW – CHECK ROUNDS
MAINTENANCE MANAGEMENT

DIMO MAINT: YOUR CMMS PARTNER

For ski resort professionals, the development of mountain services and activities makes the management of increasingly high-tech equipment even more complex.

The **safety levels, indispensable** for the proper operation of this equipment, involve:

- **Enhance the reliability and ensure the sustainability of the facilities:** cable cars, chairlifts, snow guns, ice rinks, buildings, vehicle fleet, snow groomers, etc.
- **Increase the availability and the life cycle** of the equipment
- **Monitor the regulatory controls**
- **Control costs and ensure the profitability of the business**
- To give a sense of **security to users:** repair of breakdowns of ski lifts, ski trail maintenance, customer satisfaction, and even evacuation of ski areas in case of danger
- **Set the equipment depreciation** like chairlifts over 20 to 30 years

By ensuring **the monitoring of the maintenance activity and subcontracting contracts**, DIMO Maint's CMMS plays a key role in the quality of the maintenance department and notably enables you to:

- Structure **the fleet of ski lifts in tree form**
- **Identify and track all of the administrative, technical and regulatory data** on each equipment record
- Monitor the **systematic maintenance** recommended by the manufacturers and the legislation
- **Manage the winter corrective maintenance** with big security and economic issues
- **Schedule the summer preventive maintenance**, which is important and includes a great number of tasks
- **Capitalise on the repairs** by archiving the breakdown history
- **Manage the spare parts references** and the replenishment

SOLUTIONS ADAPTED TO THE SPECIFICITIES OF YOUR BUSINESS SECTOR

- Equipment tree view : ergonomic, accessible and usable by maintenance technicians,
- Ski lift components management : pulleys, cables, clamps, brakes, safety devices, etc.,
- Extremely efficient search tools (filter), enabling information to be found in just a few clicks,
- Spare parts management,
- Order management,
- Repairable parts follow-up,
- Costs and budgets monitoring and equipment replacement decision-making,
- Work order list (to do, in progress or done),
- Exportation of all documents or reports in Excel format.
