

AI-ENHANCED SAAS CMMS

A CMMS DESIGNED FOR FAST USER ADOPTION

DimoMaint MX is designed to be intuitive for users with little or no technical background, enabling them to focus on what matters most: maintenance. Rapid deployment is supported by powerful data import capabilities that seamlessly migrate existing asset, spare parts and maintenance history data without manual re-entry.

Asset creation is both intuitive and structured, while attaching photos to assets and spare parts makes them easier to identify in the field and improves maintenance quality. Information is instantly accessible, collaboration is streamlined, and

AI-powered capabilities assist users with fault diagnosis and help transform field data into valuable operational insights. Available as a Cloud-based SaaS solution, DimoMaint MX delivers fast implementation with no technical infrastructure constraints, secure access from any device (including mobile and offline use), automatic updates, data protection aligned with modern security requirements, and seamless integration with your existing information systems.

BENEFITS

Manage your maintenance operations from a single dashboard

Access a fully customisable dashboard tailored to your role. View your schedule, alerts, favourites and KPIs at a glance, and create maintenance requests directly from the home screen. Intuitive tab-based navigation makes everyday use simple and efficient.

Increase technician productivity

Provide technicians with instant access to the information they need, including schedules, work orders and alerts, while automating report completion to improve efficiency. AI-powered assistance supports fault diagnosis using equipment history and automatically structures voice-recorded maintenance reports. The result is faster, more reliable interventions while making better use of technicians' expertise.

Improve planning and intervention reliability

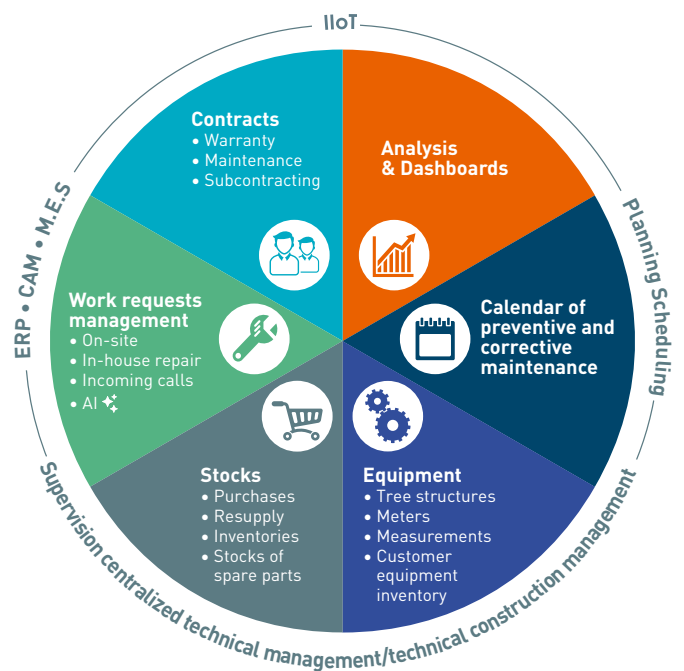

Optimise maintenance through configurable maintenance procedures and workflow automation, including emails, work orders and operational follow-up. AI analyses previous maintenance activities to identify recurring issues and support more informed maintenance decisions.

Deploy internationally with confidence

With built-in support for multiple languages, currencies and time zones, DimoMaint MX removes the complexity of international deployments and simplifies maintenance management across global operations.

Scale without limitations

Benefit from a solution built using the latest web technologies and delivered as a Cloud/SaaS platform, extending secure mobility to every user.

NEW AI FEATURES

AI-Powered Voice Reporting

Technicians simply dictate their maintenance report, and AI automatically structures it within the CMMS.

- Up to 60% reduction in administrative time
- More complete and consistent maintenance reports
- Incremental data capture with AI guidance

AI-Assisted Fault Diagnosis and Repair

AI analyses CMMS maintenance history to identify likely root causes and recommend corrective actions.

- Faster diagnostics and more confident decision-making
- Intelligent use of historical maintenance data
- Contextual recommendations delivered when they are needed most

KEY ADVANTAGES

- 100% web-based CMMS
 - Freedom to use your preferred web browser
 - Modern, intuitive user experience with responsive screens, configurable widgets, tab-based navigation and favourite menus
 - Multi-language, multi-time-zone and multi-currency support
- AI-enhanced CMMS
 - Cross-platform access: desktop, tablet and smartphone app
 - Role-based configuration for supervisors, technicians, requesters and guest users
 - High-performance architecture delivering fast response times and rapid data processing
